Length of Example: 15001 race_id: middle2.txt:0, context_sentence: Drinking water is good for your health. There are some scientific ways of drinking water.

1. It is the best medicine to drink two glasses of water in the morning.

2. Drink clean water.

3. Drink the water that has not been boiled.

Many people think boiled water is safe and good to people's health. In fact, it is not true. The boiling point of water is 100degC. By boiling it, most bacteria in water can be killed. In the past, the water was less polluted. So boiling was a good way to make clean water. But heavy metals and other dangerous things in today's water are much more terrible than bacteria. Boiling doesn't fix that problem. And boiling water may give us more of the dangerous things in our glass.

4. Never use soft drinks to take the place of water.

5. Water is also needed in winter.

6. Drink water at the right time.

1) After getting up in the morning, you have less water in your body, because you weren't drinking for the whole night. So you should drink some water to keep your

health after getting up in the morning. That can prevent high blood pressure, cerebral hemorrhages and so on.

2) Drinking water at about 10 am helps your body keep enough water.

3) Drinking water at about 3 pm can clean out the wastes in your body.

4) About eight o'clock in the evening is the best time to drink water. Your blood gets thicker when you sleep. Water will make your blood less thick.

Besides, we should drink 2L of water every day. Water is so important for our life. We should drink water often., start_ending: According to the passage, _ in the morning is the best _ ., ending_0: drinking some hot soup; medicine, ending_1: drinking some porridge; breakfast, ending_2: drinking some water; medicine, ending_3: Drinking some soft drinks; medicine, label: 2

choice: 3

tokens: [CLS] drinking water is good for your health . there are some scientific ways of drinking water . 1 . it is the best medicine to drink two glasses of water in the morning . 2 . drink clean water . 3 . drink the water that has not been boiled . many people think boiled water is safe and good to people ' s health . in fact , it is not true . the boiling point of water is 100 ##de ##gc . by boiling it , most bacteria in water can be killed . in the past , the water was less poll ##uted . so boiling was a good way to make clean water . but heavy metals and other dangerous things in today ' s water are much more terrible than bacteria . boiling doesn ' t fix that problem . and boiling water may give us more of the dangerous things in our glass . 4 . never use soft drinks to take the place of water . 5 . water is also needed in winter . 6 . drink water at the right time . 1) after getting up in the morning , you have less water in your body , because you weren ' t drinking for the whole night . so you should drink some water to keep your health after getting up in the morning . [SEP] at about 3 pm , drinking water can clean out the _ in your body . fat [SEP]

level middle

After sorted: ./datasets/RACE/dev/middle/13.txt

level high

After sorted: ./datasets/RACE/dev/high/63.txt

Length of Example: 1481 race_id: middle13.txt:0, context_sentence: What is color? Why do some of the things around us look red, some green, others blue?

Colors are really made by deflected light. We see color because most of the things reflect light. In the same way, if something is green, it reflects most of the green light. If something reflects all light, it is white. If it doesn't reflect any light, it is black.

Some of the light is reflected and some is taken in and turned into heat .The darker the color is, the less light is reflected, the more light is taken in. So dark-colored clothes are warmer in the sun than light-colored clothes., start_ending:

When something reflects light, we can _ ., ending_0: see its color, ending_1: see its heat, ending_2: not see its color, ending_3: see nothing, label: 0

Length of Example: 22256 race_id: middle2.txt:0, context_sentence: Drinking water is good for your health. There are some scientific ways of drinking water.

1. It is the best medicine to drink two glasses of water in the morning.

2. Drink clean water.

3. Drink the water that has not been boiled.

Many people think boiled water is safe and good to people's health. In fact, it is not true. The boiling point of water is 100degC. By boiling it, most bacteria in water can be killed. In the past, the water was less polluted. So boiling was a good way to make clean water. But heavy metals and other dangerous things in today's water are much more terrible than bacteria. Boiling doesn't fix that problem. And boiling water may give us more of the dangerous things in our glass.

4. Never use soft drinks to take the place of water.

5. Water is also needed in winter.

6. Drink water at the right time.

1) After getting up in the morning, you have less water in your body, because you weren't drinking for the whole night. So you should drink some water to keep your health after getting up in the morning. That can prevent high blood pressure, cerebral hemorrhages and so on.

2) Drinking water at about 10 am helps your body keep enough water.

3) Drinking water at about 3 pm can clean out the wastes in your body.

4) About eight o'clock in the evening is the best time to drink water. Your blood gets thicker when you sleep. Water will make your blood less thick.

Besides, we should drink 2L of water every day. Water is so important for our life. We should drink water often., start_ending: According to the passage, _ in the

morning is the best _ ., ending_0: drinking some hot soup; medicine, ending_1: drinking some porridge; breakfast, ending_2: drinking some water; medicine, ending_3: Drinking some soft drinks; medicine, label: 2

Length of Example: 1481 race_id: middle13.txt:0, context_sentence: What is color? Why do some of the things around us look red, some green, others blue?

Colors are really made by deflected light. We see color because most of the things reflect light. In the same way, if something is green, it reflects most of the green light. If something reflects all light, it is white. If it doesn't reflect any light, it is black.

Some of the light is reflected and some is taken in and turned into heat .The darker the color is, the less light is reflected, the more light is taken in. So dark-colored clothes are warmer in the sun than light-colored clothes., start_ending: When something reflects light, we can _ ., ending_0: see its color, ending_1: see its heat, ending_2: not see its color, ending_3: see nothing, label: 0

Length of Example: 1454 race_id: middle1.txt:0, context_sentence: Take a class at Dulangkou School, and you'll see lots of things different from other schools, You can see the desks are not in rows and students sit in groups. They put their desks together so they're facing each other. How can they see the blackboard? There are three blackboards on the three walls of the classroom!

The school calls the new way of learning "Tuantuanzuo", meaning sitting in groups. Wei Liying, a Junior 3 teacher, said it was to give students more chances to communicate.

Each group has five or six students, according to Wei, and they play different roles .There is a team leader who takes care of the whole group. There is a "study

leader"who makes sure that everyone finishes their homework. And there is a discipline leader who makes sure that nobody chats in class.

Wang Lin is a team leader. The 15-year-old said that having to deal with so many things was tiring.

"I just looked after my own business before,"said Wang. "But now I have to think about my five group members."

But Wang has got used to it and can see the benefits now.

"I used to speak too little. But being a team leader means you have to talk a lot. You could even call me an excellent speaker today."

Zhang Qi, 16, was weak in English. She used to get about 70 in English tests. But in a recent test, Zhang got a grade of more than 80.

"I rarely asked others when I had problems with my English tests. But now I can ask the team leader or study leader. They are really helpful.", start_ending: A discipline leader is supposed to _ ., ending_0: take care of the whole group, ending_1: make sure that everybody finishes homework, ending_2: make sure that nobody chats in class, ending_3: collect all the homework and hand it in to teachers, label: 2

tokens: [CLS] take a class at du ##lang ##kou school , and you ' ll see lots of things different from other schools , you can see the desk ##s are not in rows and students sit in groups . they put their desk ##s together so they ' re facing each other . how can they see the black ##board ? there are three black ##boards on the three walls of the classroom ! the school calls the new way of learning " tu ##ant ##uan ##zu ##o " , meaning sitting in groups . wei li ##ying , a junior 3 teacher , said it was to give students more chances to communicate . each group has five or six students , according to wei , and they play different roles . there is a team leader who takes care of the whole group . there is a " study leader " who makes sure that everyone finishes their homework . and there is a discipline leader who makes sure that nobody chat ##s in class . wang lin is a team leader . the 15 - year - old said that having to deal with so many things was ti ##ring . " i just looked

after my own business before , " said wang . " but now i have to think about my five group members . " but wang has got used to it and can see the benefits now . " i used to speak too little . but being a team leader means you have to talk a lot . you could even call me an excellent speaker today . " zhang qi , 16 , was weak in english . she used to get about 70 in english tests . but in a recent test , zhang got a grade of more than 80 . " i rarely asked others when i had problems with my english tests . but now i can ask the team leader or study leader . they are really helpful . " [SEP] a discipline leader is supposed to _ . collect all the homework and hand it in to teachers [SEP]
